Carbon Neutral Carpet

Comfortable, beautiful and good for the planet too, Swaledale brings carbon neutral carpet to the home for the very first time.

Available in 20 exquisite shades and made from a wool-rich blend, this carbon neutral carpet is made from the fleece of just one breed of hardy British sheep, the Swaledale. In both four and five metre widths, Swaledale also helps you to do your bit for the environment by keeping waste to an absolute minimum. And all this friendliness doesn't have to come at a price as the carpet is exceptionally good value at just £25 per square metre.

For stockist information contact Axminster Carpets at www.axminstercarpets.co.uk or call 01297 630650
